## Anyone think online poker is \"rigged\"??

I guess by now, most of you know about the cheating scandal at Absolute Poker. My question is, if this could happen at a "reputable" place like Absolute, could this be happening just about anywhere???? :blink:

My opinion, in general most online sites are legit but in multi table tournies these places like to get as many people out as soon as they can, so you'll see a lot of 3 and 4 way all-ins where everyone has a MONSTER set of pocket cards (that just doesn't happen in real life)

That sucks that there are rigged online games. I'm glad I don't play with real money! lol.

It seems like pokerstars is rigged, you would be amazed how many four of a kinds I get in a single night! Probably like 4 on average.
